

project manager – green building

- **International Publicly listed company**
- **Large Complex Energy Performance Projects**
- **Major Corporate Clients**

This multinational benefits from decades of international expertise in engineering, consulting and project management for various industries.

You will join the group as a Project Manager (Energy & Environment) for green building, clean tech energy and technology upgrades. You will provide project management for large and complex energy performance projects with major clients. Your success will depend on your capacity to provide technical specifications in areas including mechanical plant and on-site power generation. You will have the financial responsibility for the projects and be involved in tenders.

You have a Degree in engineering plus at least 5 year's relevant experience in construction project management and large building upgrades. Proven track record in delivery of >\$1M technology based projects (mechanical and electrical retrofit, embedded generation systems, HVAC, co-generation power systems, energy management, water systems etc.) essential.

To be part of the clean energy revolution with a serious player, contact **Simon Fjell** to discuss in confidentiality or directly apply.
