

recruitment consultant

- **Leading Energy & Carbon Consultancy**
- **Sydney and Melbourne Opportunities**

Bradman Recruitment is a long established firm being 12 years in business. We are tightly specialised in three areas: Energy and Carbon, Finance and the Not for Profit industries. In Energy and Carbon we recruit across the entire spectrum of positions in the climate sector such as carbon, energy trading, risk, economics, policy, renewable energy, sustainability, cleantech, project management etc.

Ideally we are seeking an experienced recruitment consultant with Australian energy/carbon experience. It could be from any of the areas mentioned above. We conduct quality campaigns with our work mainly being retained and exclusive. Alternatively, you could be working in one of the above capacities and would consider doing something slightly different - recruiting to the sector.

Either way, if you would like to discuss this interesting opportunity please call **Michael Green** or just submit your resume.

Bradman Recruitment – Level 50, 120 Collins Street, Melbourne 3000
