

financial risk analyst

- **Finally – an Analytical Role with Purpose!**
- **Use Your Analytical Skills to Reduce Greenhouse Gases**
- **Succession Planning/Job Rotation**

To meet dramatic Green Energy supply targets this energy industry organisation is significantly increasing its Trading Team and Middle Office Support. Trading activities are predominately in Derivatives - particularly Options.

You will be involved in reporting of market and credit risk exposures, development of middle and front office modelling, processes and valuation methodologies. You will also be responsible for monitoring of compliance with Board approved Trading Policies and assisting the divisional manager in the development of Procedures and Policies. In addition you will manage a number of interesting projects including developing specialised components of the in-house risk capabilities.

You have a Mathematics degree, or similar, two to three years experience and, ideally, a knowledge of trading activities in derivatives. This is an exciting role with a direct impact on one of the world's major concerns – Global Warming.

If you are interested in putting your specialist mathematics skills to work in an environment you may not have initially considered then contact **Michael Green** or **Gareth Aitken** or submit a brief resume to the address below quoting **Ref. No. 26659**.
